## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Shah et al (Shah).

Shah's Fig. 5 clearly illustrates a calculation circuit for providing multiples of an integer  $x$  ( $x...7x$ ) to form a product  $xy$  ( $cx$ ) including adder and shift circuits (the adders and subtractor and the means to form the even multiples of  $x$ ), a plurality of registers (registers), a plurality of multiplexers (MUXs) and a summation circuit (pipeline adder tree).

### ***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-12, 18 and 19 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims are directed to a method or process for performing a multiplication via a mathematical algorithm to produce a multiplication result. The claims are not limited to a

Art Unit: 2193

practical application of the mathematical algorithm because the multiplication result is not a tangible result because it is not a real-world result.

Claims 18 and 19 fail to be included in any of the statutory categories of invention because they may be read on a “signal” which is merely a form of energy.

### ***Claim Rejections - 35 USC § 112***

4. Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1; paragraph (d) appears to be mis-descriptive because is not the sum derived from the products of paragraph (c) rather than from the pre-calculated multiples? Similarly note claim 13. In claim 1 the “so” phrase of paragraph (f) does not follow from the preceding language. In claim 15 in line 1 it appears that the word “each” should be deleted and lines 3-4 are grammatically incorrect.

### ***Drawings***

5. In Fig. 3 adders 171 and 181 are incorrectly labeled with a & sign.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
